Address

Belgrade, Serbia

Tech Stack

- TypeScript, JavaScript (ES6+), C#, SQL
- React Native, Expo, React, Next.js
- Vue.js, Angular, HTML5, CSS3
- Node.js, NestJS, Express.js, ASP.NET Web API
- PostgreSQL, SQL Server, TypeORM, Supabase, Redis
- EST APIs, WebSockets / Socket.IO, JWT, AI Integrations, pgvector

Tools

- Git & GitHub
- Docker & Docker Compose
- Postman & Swagger / OpenAPI
- Jest, React Native Testing Library & Maestro
- Visual Studio & VS Code
- IIS & Windows Server

Miloš Nikolić

FULL-STACK SOFTWARE ENGINEER

Product-minded Full-Stack Software Engineer with hands-on experience building cross-platform mobile and web applications from concept to working MVP.

Skilled in TypeScript, React Native/Expo, NestJS/Express and PostgreSQL, with practical experience in AI integrations, vector search, real-time communication, authentication and REST API development.

Combines a strong IT operations background with frontend expertise, structured problem-solving and a focus on reliable, user-centered products.

Education

October 2022 - October 2025

Bachelor of Applied Studies in Information Systems and Technologies Belgrade Academy of Business and Arts Applied Studies (BAPUSS), Belgrade

- Gained practical experience in object-oriented programming (C#/C++), database design and SQL, web development, software engineering and information-system design.
- Applied these concepts by developing desktop and web applications using .NET and modern frontend technologies.
- Final thesis: Ethics of Artificial Intelligence.

Professional Experience

April 2022 - Present

Freelance Web Designer & Frontend Developer

- **UI/UX Design:** Designed modern, responsive user interfaces for small business clients using Figma and Adobe XD, focusing on user experience and accessibility.
- **Web Development:** Translated designs into functional websites using HTML5, CSS3/SASS, and WordPress (Elementor), ensuring cross-browser compatibility and mobile responsiveness.
- **Client Management:** Managed full project lifecycles from initial concept and wireframing to final delivery and deployment.
- **Brand Identity:** Assisted clients in establishing digital branding, including logo creation and consistent visual style guides.

April 2015 - Present

Senior IT Technical Support Specialist at Parking Servis, Belgrade

- **System Operations:** Ensured stability and performance of office IT infrastructure, managing workstations, peripherals, and local networks for over 100 employees.
- **Technical Troubleshooting:** Served as the main point of contact for diagnosing and resolving complex hardware/software issues, minimizing downtime.
- **Software Management:** Oversaw the deployment and maintenance of business-critical applications and security updates across the organization.
- **User Support & Training:** Onboarded new employees and provided technical guidance on internal systems and best security practices.

Soft Skills

- Product-Minded Problem Solving
- Ownership & Initiative
- Cross-Functional Collaboration
- Attention to Detail
- Troubleshooting & Attention to Detail

Languages

- Serbian - Native
- English - Professional Working Proficiency

Startup & Project Experience

- **Qynta - AI-Powered Social Networking Platform**
 - Co-developed an AI-powered networking platform that connects builders and professionals around shared interests, skills and collaboration opportunities.
 - Built cross-platform mobile features with React Native and Expo, supported by a modular NestJS/TypeScript backend and a Next.js marketing website.
 - Worked on AI-assisted matching and guidance, embeddings and pgvector search, real-time chat and notifications, gamification, and scalable backend services using PostgreSQL, TypeORM, Redis and BullMQ.
- **MotoMeet - Motorcycle Social & Matching Platform**
 - Developed a cross-platform MVP that enables verified motorcyclists to discover riders, express mutual interest, match and communicate through in-app chat.
 - Built typed React Native/Expo screens and Express/TypeScript APIs for OTP/JWT authentication, user profiles, discovery, matching, messaging, ratings, reporting and blocking.
 - Designed vehicle-document upload and manual admin approval flows with Supabase/PostgreSQL integration, incorporating identity verification, GDPR and user-safety requirements into the product architecture.
